DETAILED ACTION

Applicant's election of group I in the reply filed on 10/30/2006 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Accordingly, claims 1-10 are now pending in the application.

Specification

1. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-4, 6, 8 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ahn, US Patent No. 6,774,975.

Regarding the above claims, Ahn's figures 3-4 and accompanying text discloses a liquid crystal display (LCD) device comprising:

. a color filter substrate (71)

Art Unit: 2871

. a thin film transistor (TFT) substrate (51) including a plurality of gate lines (55) and a plurality of source lines (66)

. a plurality of spacers (68 and 79) leaning against both the gate lines and source lines (e.g., at the intersection of the gate lines and source lines)

. a liquid crystal layer.

Although Ahn does not disclose the spacers disposed on the color filter substrate, it would have been an obvious to one having ordinary skill in the art at the time the invention was made to employ a spacer over the color filter substrate (i.e., upper substrate) in stead of that over the TFT substrate (i.e. lower substrate) since the examiner takes Office Notice of the equivalence of forming a spacer over the color substrate and forming a spacer over the TFT substrate for their use in the LCD art and the selection of any of these known equivalents to obtain an uniform thickness for an LCD panel would be within the level of ordinary skill in the art.

Allowable Subject Matter

4. Claims 5, 7 and 9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
